SUMMARY OF CONTRIBUTIONS TO SCIENCE

Policy

- Our team conducted some of the initial work describing the relationship between [governance systems](#) and the delivery of public health programs. I have served as an expert/consultant for multiple Canadian reports (three federal Auditor General Reports, Report of the National Advisory Committee on SARS and Public Health, testimony to the Senate Sub-Committee on the 2008 Listeria outbreak) as well as twice serving as a consultant to the World Health Organization examining the International Health Regulations.
- Our work on vaccine policy and consultation with the Vaccine Task Force directly led to the introduction of Canada's Vaccine Injury Support Program.

Science

- Our team authored the seminal papers on [social media](#) and the spread of vaccine misinformation.
- Supported by the Bill & Melinda Gates Foundation, our team developed a metabolic algorithm that can estimate the gestational age of an infant at birth with a high degree of accuracy. In partnership with Stanford University this algorithm is being applied in multiple global settings where prenatal ultrasound may not be available.

Innovation

- Our team have been leaders in digital immunization solution innovation. My team developed the world's first digital immunization record, the first digital reporting of immunization status, the first pan-Canadian standardization of vaccine terminology, the first digital reporting of adverse events following immunization in Canada, the first proof of concept mobile barcode scanning of 2D vaccine barcodes solution and were the first to introduce the concept of digital immunization passports.
- At the Ottawa Hospital our team created the Ottawa mHealth Lab which supported scientists in developing digital solutions to improve patient care.
- At Bruyère I have supported the development of an innovation agenda to help test commercial solutions in healthcare.

RESEARCH AND INNOVATION

Companies Founded

1. *CANImmunize Inc* (2019). Digital Immunization Solutions Company
2. *Sigvaria Mobile Technologies Inc.* (2012). mHealth development company - converted to The Ottawa Hospital mHealth Lab)

IP/ Product Development

1. *CANImmunize Shield*. Workplace vaccination tracking software.
2. *CANImmunize Clinic Flow*. Mass Immunization clinic software.
3. *CANImmunize Adult Immunization Assessment Tool*. Software to ascertain adult immunization needs.
4. *CANImmunize Pediatric Transplant*. Software to help manage pediatric transplant immunization needs.
5. *CANImmunize* (iPhone, Android, Web) Canada's consumer facing digital immunization platform
6. *Canadian Vaccine Catalogue*. Source of truth for vaccine terminology in Canada.
7. *CANVAS app* (research study pilot iPhone app designed for reporting adverse events following influenza immunization)
8. *The Ottawa Rules app* (iphone and Android app to make the Ottawa Rules more accessible to emergency room clinicians)
9. *OK Kidney* (research study iPhone app to assist dialysis patients in managing dietary phosphate intake)
10. *RecoverNow* (Android platform to facilitate stroke rehabilitation through the use of prescribed apps)

11. *Immunity Warriors: Invasion of the Alien Zombies*. A digital motion comic to teach children about immunization.

12. *SafeLiving*. (Immunization app for transplant patients for iOS and Android)
